Made in Italy

The **Slim TS** Line meets in simple, safe and economical way goods transport and lifting requirements characterizing industrial and craft environments.

They can easily lift loads **up to 180 kg.** thanks to the reduction unit that can be operated either manually or by means of a drill-screwdriver,

They are equipped with an handy handle and four large wheels to guarantee an easy and safe load transport,

The aluminium column and the forks can be removed from the base to make it very versatile and easy to transport on **motor vehicles and small lorries**, meeting the requirements of small craft concerns as well,
