

SPECIFICATION SLIDING FORKS

Accessory created by CTE to add new features to the Pianoplan Vertical model. This accessory allows you to lift the load through two forks, mounted on sliding and turning trolley. This allows you to load an object placed vertically, bring it to a horizontal position, and rotate the load so that it is in a longitudinal position with respect to the Pianoplan.

TECHNICAL DATA

- Minimum loading height 50mm
- Maximum loading height 1.100mm
- Fork width 410mm
- Fork section length 600mm
- Maximum load 500kg
- 360 degrees rotation
- Rotation block every 90 degrees, 4 blocks with self-locking plug
- Height block every 100mm, total 10 positions with double self-locking plug
- Frame weight 40kg
- Forks weight 50kg
