

CL1 Vacuum Lifter

Examples of use

Roofing panels installation

Install polyurethane and mineral wool sandwich roofing panels by adapting CL1 in its standard configuration.

Extra-long roofing panels installation

Use vacuum lifter in its extended configuration (CL1-EXT) for extra-long sandwich panels installation.

Wall vertical panels installation

CL1 allows an easy, fast and safe installation of wall sandwich panels, no matter their length.

**Ideal for
mineral wool
panels**

Wall horizontal panels installation

CL1 vacuum lifter is a trustworthy ally even for installing wall sandwich panels horizontally.

Special panels installation

For installing special panels, such as roof-tile effect panels, wavy panels and corrugated sheet metal, CL1 vacuum lifter can be equipped with dedicated suction pads.
