The Vacuum Lifter for sheet metal F10EB is a model with **electric operating system** 400V three-phase or 220V single-phase. The model F10EB 2000 has a maximum capacity of 2000 kg, it has a cross-beam which can be made with different lengths, on standard models L3000 mm, L4000 mm or L5000mm and it has 10 suction pads distributed on 5 arms. The pads, equipped with springs, are specific for sheet metal made in **special oil-resistant vulcanized rubber**.

The adjustment of the position of the plates and arms, together with the possibility of **using only the central pads**, allows to adapt the lifter to the different formats of the metal sheets to be lifted. The F10EB 2000 model has a steel reinforced structure and a horizontal fixed frame.
