**Power supply**  
**Electricity**

FT10EB3000 is a sheet metal vacuum lifter with telescopic frame.

Being its length adjustable from 2860mm to 5000mm, it is the perfect vacuum lifter for handling sheet metal of variable dimensions such as 6000x2000mm, 4000x2000mm and 3000x1500mm. Moreover, FT10EB3000 comes equipped with the possibility of excluding arms from suction by simply switching off a tap.

Its 10 suction pads, made of special oil-resistant vulcanized rubber, are placed on five cross-arms to assure firm hold and support on even the longer sheet metal.

This model with electric power supply is ideal for use on overhead cranes and other lifting means.

### Technical specification

Application	Metal sheet, stainless steel, aluminium, plastic panels
Lifting capacity	3000 kg
Suction pads	Nr. 10 vacuum pads d. 390 mm
Frame	Steel telescopic frame structure fixed in horizontal position Adjustable position of suction pads on the arm
Operating system	Electrically operated
Vacuum system	Vacuum circuit with vacuum reservoir, non-return valve, vacuum filter
Safety systems	Vacuum gauge with colored scale Audio visual low vacuum warning powered independently and with back up battery
Weight of lifter	341kg
Command	Suction and release by slide valve command with safety system

Horizontal lifting

Safety devices

Telescopic frame

10 suction pads  
d.390 mm

Capacity 3000Kg

Available also with  
capacity 1800kg

For standard sizes:

3 x 1,5 m

4 x 2 m

6 x 2,5 m

made in  
ITALY
