

Vacuum Glass Lifter VB8 RCMBM d4

The VB8 RCMBMd4 is vacuum lifter with manual tilt and rotation, battery operating system and dual vacuum circuit.

The VB8 RCMBM d4 is a below-the-hook lifting accessory suitable for lifting and handling of glass units weighing up to 1200 kg.

The VB8 RCMBM d4 features manual tilt and manual 360 degree rotation.

Technical specification

Application	glass panels
Lifting capacity	max 1200 kg
Suction pads	number 8 round pads, diameter 390mm pads with safety ring and sealing lip
Pad spread	mm 1810x1360 in 8 pads configuration
Load movement	continuous powered 360 degree rotation 90 degree powered tilt
Operating system	DC vacuum pump powered from on-board batteries high capacity re-chargeable batteries battery status indicator economizer for reduction of the energy consumption
Vacuum system	2 independent vacuum circuits, each vacuum circuit with vacuum reserve and non return valve
Weight of lifter	Kg 110
Structural depth	mm 250
Control	Manual slider valve for suction / release on the device release of the load by unique dual action command Remote control as optional
Standard features	Audible and visual low vacuum warning devices Vacuum gauge for each vacuum circuit Battery charger 240 Volt Vacuum filter Multi position hook connection

- Lifting capacity max 1200 kg
- No.8 larger suction pads Ø 390 mm
- Battery operating system
- Manual continues 360° rotation
- Manual 90° tilt
- Low vacuum warning device
- ✓ Dual vacuum circuit built to EN13155 standard
