

## Vacuum glass lifter

## VEB10+4T FV

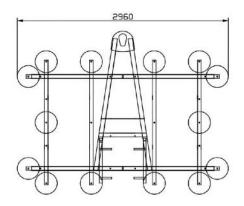

VEB10+4T FV is part of a range of vacuum lifters with **vertical fixed structure** for lifting and handling large glass slabs in production area. This big vacuum glass lifter measures 2960 mm wide, extendable up to 4920 mm, thanks to its **telescopic structure**. The maximum height of the vacuum pads is 2030 mm. As optional, it is possible to add the metallic protection guard to increase operator safety.

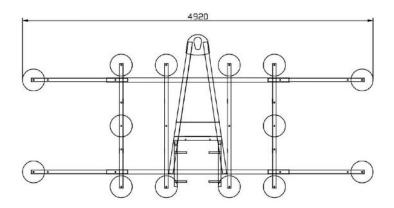

In addition to the standard models, we can create **customized structures** both for the capacity and for the dimensions. The series is also available in a version with compressed air operating system.

## Vacuum glass lifter

## **Technical specification**

Application	Jumbo glasses
Lifting capacity	Max 1400 kg
Suction pads	No. 14 round suction pads diameter 310 mm
	Lipped pads with safety ring
Pad spread	Min spread mm 2960 x 2030
	Max spread mm 4920 x 2030 – TELESCOPIC STRUCTURE
Load movement	Fixed frame in vertical position
Operating system	Electric powered
	400V 3 phase 50Hz OR 220V single phase 50Hz
Vacuum system	Single vacuum circuit
Weight of lifter	Kg 239
Control	Manual on off valve on the lifter's frame
	Release of the load by dual action security command
Standard features	Audible and visual low vacuum warning devices
	Vacuum gauge
	Battery charger for alarm system
	Vacuum filter
Optional	Metallic protection guard
	Radio remote control
	Dual vacuum circuit
