Model **smart vacuum lifters**

VEB10-FV

Vacuum glass lifter

 Kg max
1000

 Power supply
Electricity

Picture: VEB10-FV with optional protection guard and dual vacuum circuit

VEB10- FV is part of a range of vacuum lifters with **vertical fixed structure** for lifting and handling large glass slabs in production area. This big vacuum glass lifter measures 2760 mm wide. The maximum height of the vacuum pads is 2030 mm. As optional, it is possible to add the metallic protection guard to increase operator safety.

In addition to the standard models, we can create **customized structures** both for the capacity and for the dimensions. The series is also available in a version with compressed air operating system.

Fixed frame in vertical

Capacity max 1000kg

Electric operating system

Safety devices

10 vacuum pads d.310 mm

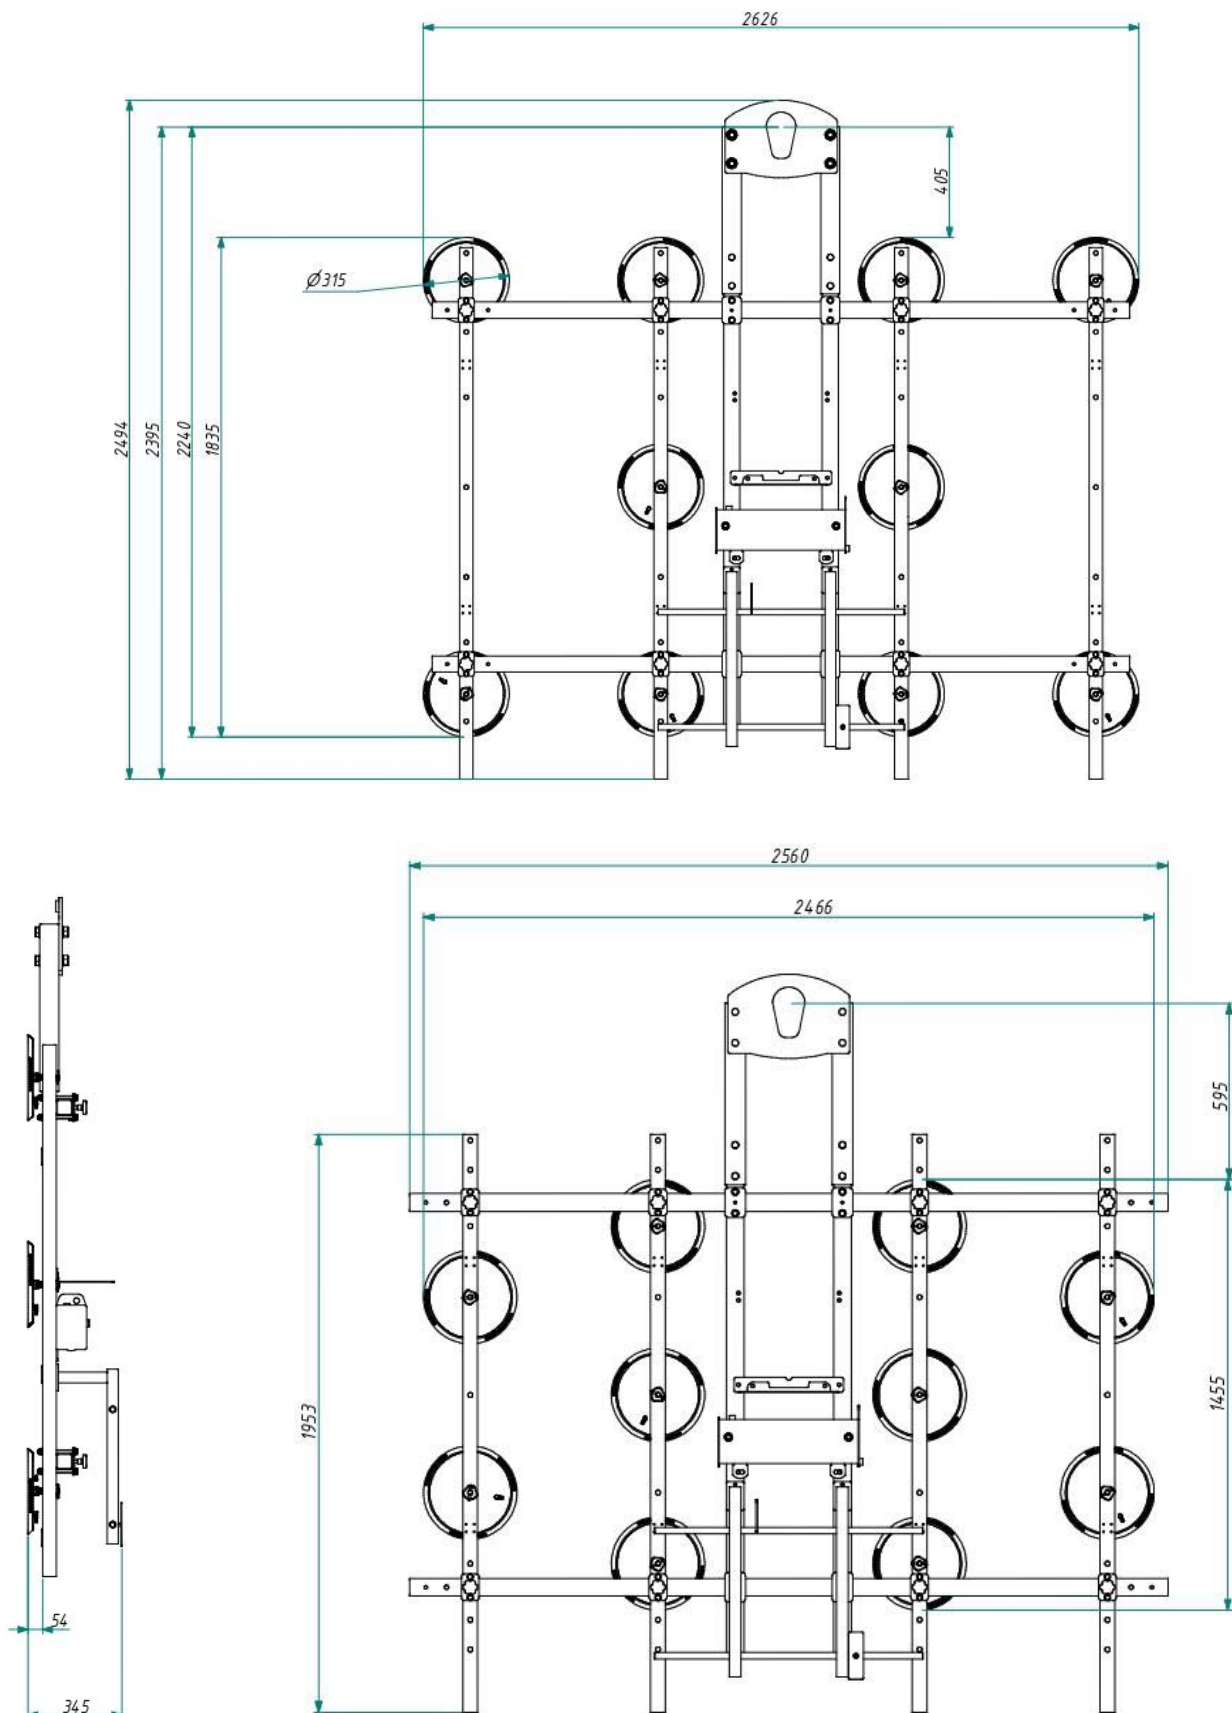

Indoor use

Technical drawing

Technical specification

Application	Jumbo glasses
Lifting capacity	Max 1000 kg
Suction pads	No. 10 round suction pads diameter 310 mm Lipped pads with safety ring
Pad spread	Min spread mm 2760 x 970 Max spread mm 2760 x 2030
Load movement	Fixed frame in vertical position
Operating system	Electric powered 400V 3 phase 50Hz OR 220V single phase 50Hz
Vacuum system	Single vacuum circuit
Weight of lifter	Kg 212
Control	Manual on off valve on the lifter's frame Release of the load by dual action security command
Standard features	Audible and visual low vacuum warning devices Vacuum gauge Battery charger for alarm system Vacuum filter
Optional	Metallic protection guard Radio remote control Dual vacuum circuit
